Why Agile Project Management?

Elevate Your Value

Employers are increasingly interested in mastery of Agile project-management methods such as Agile, Scrum, and Kanban.

Lead Project Success

A study by McKinsey & Company found that embracing Agile methodologies resulted in a 20-30% increase in project success rates,

Who is this course for?

- Aspiring project managers who are new to project management and want to establish a strong foundation in Agile project management concepts, methodologies, and best practices.
- Experienced project managers working in traditional project management and are interested in Agile approaches.
- Business owners involved in project decision-making to better understand project progress, risks, and issues, and effectively communicate customer needs.
- Technical professional interested in deepening their understanding of Agile principles, sprint cadence, and Agile tools and technology.

What can you expect to learn?

- Deep dive into Agile methodologies, principles, and best practices through our meticulously crafted modules.
- Proficiency into Agile methods and processes. Adopt an Agile mindset and learn about the Agile-Scrum methodology, including sprint cadence.
- Develop your project reporting and communication skills. Discover the power of AI-generated burndown charts and data-driven charts for tracking project progress .
- Acquire the skills to embrace an ever-changing scope, and execute problem-solving frameworks within an Agile framework.

Curriculum Overview

Module 1 – Project Management essentials

Gain knowledge and practical insights into the fundamental concepts, stages, and key activities of the project management lifecycle.

Module 2 – Agile methods and processes

Learn about the methodologies and mindset behind Agile. Gain practical knowledge of techniques like user stories, project prioritisation, and the Agile-Scrum methodology

Module 3 – Effective communication and reporting

Develop strong communication skills and improve project reporting. Learn about different types of project reports, utilise AI-generated charts, and track project progress while communicating customer needs.

Module 4 – Risk mitigation and problem solving

Learn to proactively identify and address risks that may impact your projects. Gaining skills to better embrace change, mitigate risks, and solve problems.

Module 5 – Team facilitation and power skills

Gain the expertise to guide your team effectively, cultivate a culture of trust and open communication, and drive successful outcomes aligned with project objectives.

Module 6 – Scaling complex projects

Gain an understanding of project complexity levels and explore Agile scaling frameworks such as SAFe, LeSS, and SoS.

Industry Expert

Companies that trust us

What do our customers say?

Katie Hudson

Senior Product Operations Manager

If you want a course where you sit in front of a screen and listen to a PowerPoint, this is not the course for you. If you want a course that is actually engaging, practical and will let you use real examples, it's really helpful. The skills that I gained from the course definitely helped me in my interview process to the next step.

Ashley Mclean

Product Designer

I liked how we were collaborating. That's what sets Growth Tribe apart from the course that I did with Coursera, which wasn't interactive. I'm a person who likes collaboration.

Merran Wrigley

Group Marketing Director

As a brand and marketing professional, I found the course entry to approaching my work in a more data-driven and analytical way. I know I will start benefiting from this new knowledge from the first day back in the office. So the investment in terms of time and money will be immediate to both me and my company.

Zsofia Lele
Co-founder &
Growth Manager
Pippadu

"It exceeded all my expectations. I started it just after I got a new job as Product & Digital Marketer in a startup and the course gave me a huge boost. It was really practical, exactly what I needed and I could implement what I learned right away."

Theodor Andrei
Growth Marketer
Marveltest

"Growth Tribe challenges the status quo of universities / MBA programs / etc which have fallen behind in terms of teaching people skills for the data age. You learn far more in one of their 12-week classes than an entire top-tier 3-year degree."
